# PRED[ᐧᐧ]R

Time & attendance system

About Predor

Predor is an integrated access control and time & attendance system. The events of the installed security systems can be monitored on a single software interface. **Free of charge software update. No monthly or annual fees, no hidden costs!**

Time & attendance

Automated, graphical reports radically reduce the burden on HR managers. The easy to use day off balance tracking, the automatically generated timesheets, the user-friendly web interface, the touch-screen time & attendance terminal, and many other innovative solutions make the Predor the favorite system of not only managers, but subordinates either.

TIME & ATTENDANCE TERMINAL

- 99 custom work codes
- Touchscreen display
- Available with encrypted built-in reader as well
- Temporary stand-alone operation
- Customizable graphical interface
- Easy to use

GRAPHICAL REPORTS

Attendance data and statistics are displayed on a graphical platform. The managers can view the statistics about worktime violations, overtime, worktime balance or any other activity with a single click.

AUTOMATED REPORTS

Automated reports can be generated even on a daily basis about late arrival, absenteesm, early leave, unauthorized break, or any other worktime violation.
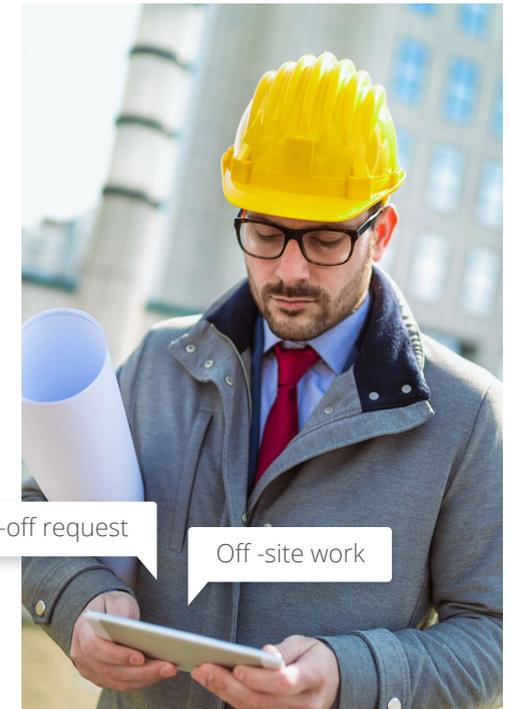

WEB INTERFACE

- Employees can check only their own attendance data.
- They are also able to request vacation days or register remote (off-site) work periods.
- Leaders can check their subordinates' worktime balance, or schedule them into shifts.
- The subordinates' requests are accepted or rejected by the line managers.

Day-off request

Off -site work

PDF TIMESHEET

The manual timesheet preparation is time-consuming. The system saves time by automatically generating the timesheets, and even sends it by e-mail. You have nothing to do but print the signable sheets.

VOCATION DAYS

The annual day-off balance can be imported with just one click. Any type of holidays can be set. Employees can even request vacation days on the web interface any time anywhere. The line managers accept or reject the requests even on their cell phones.

SHIFT SCHEDULES

Flexible, multi-shift, rotating shift or any custum shift schedules can be set. Easy to configure special break rules, core time, wage supplement, overtime, balance. The system automatically transfers data to any payroll software.

SHIFT SCHEDULE, WORKFORCE MANAGEMENT

Managers easily can shedule and optimize work shifts. In case of rotating shifts the system is able to schedule the proper shifts automatically.
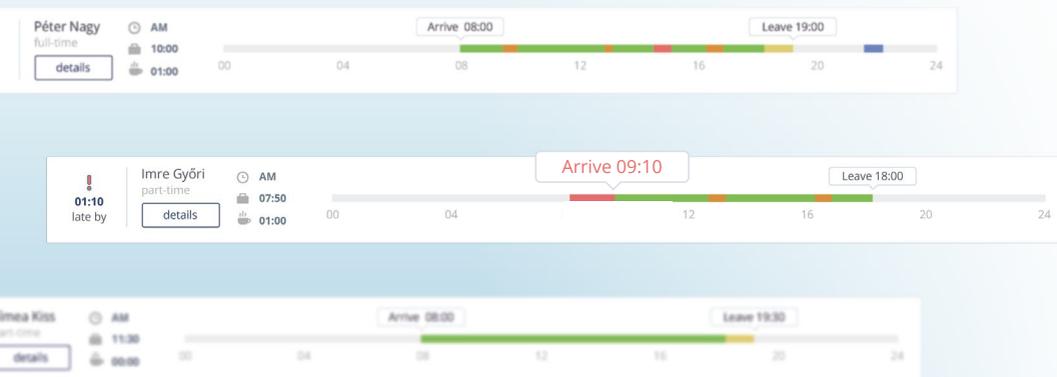

READERS CAN BE USED AS TERMINALS

Any card reader of the system can be used as worktime registration point. Thanks to the continuous time tracking easy to spot the best and worst performing employees. thereby the efficiency will be increased. The reports gives you the insight you need to make the best decisions.

2018 December

● LUNCH
12:08 (5%)

● BREAK
03:08 (1%)

● WORK
129:35 (63%)

● OFF-SITE WORK
59:48 (29%)

CUSTOMIZATION

We will implement system integration if the time & attendance system has to work together with ERP systems or payroll softwares. If you have unique requirements, our developer team will implement your concept and tailor the system to your own needs.

Free of charge software update. No monthly or annual fees,
no hidden costs!
